

PBL® MULTIPLE ACTIVATION AUTOLOCK BYPASS SYSTEM

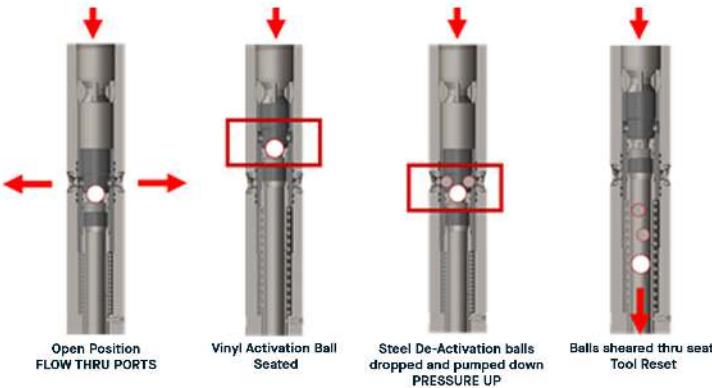

PBL

The PBL® Multiple Activation Bypass System is a simple, reliable tool that can assist you in reducing drilling costs associated with different types of hole conditions. Originally developed to enable the aggressive pumping of LCM materials and to increase circulation rates for enhanced hole cleaning, the PBL® has evolved to benefit many applications in the drilling, completion, and work over phases of a well such as:

- Pumping all types of LCM pills, including aggressive pills and cement squeezes
- Increasing circulation rates for improved hole cleaning resulting in reduced torque and drag, thereby increasing ROP
- Increasing annular velocity in highly deviated and horizontal wellbores where removal of cutting beds and hole cleaning are problematic
- Fluid displacements
- Sub-sea riser/BOP jetting
- Acidizing and stimulation treatments
- Coring applications

Unique Features:

- The PBL® tool will close when the pumps are shut down minimizing a U-tubing effect, or a possible well control issues that can occur in other tools
- The Auto-lock option, which allows for pulling a dry work-string or filling the drill-string while tripping in the hole. The Auto-lock option also provides an option to reverse circulate if necessary
- The PBL® can be cycled numerous times in a single trip
- The ball shearing pressure can be set to the operator's preference
- The main body and the catcher sub can be placed in different sections of the BHA to optimize work-string operations.

¹ Standard ID listed, larger ID's are available to accommodate coring balls, reamer balls and welfare accessories. Minimum tool ID could vary if Activation Ball or Dart is used

² Alternative PBL tool end connections may be available on request

³ Between main body and ball catcher sub

⁴ Extended length cages may be available on request

⁵ Larger port diameter available on request

⁶ 6 3/4 tool with smaller activation ball size (1 7/8") available on request

⁷ 8 1/4 HF tool with larger ID (2 65/8") available on request

⁸ 3 1/8" HF part tool available on request
